

IP 720 Telephone

The IP 720 is a fully featured IP telephone designed to empower the user.

Bringing stylish form and functionality to the desktop, the IP 720 makes sophisticated features simple and intuitive to use. Users have single button access to voicemail, activity/presence selection, voicemail greeting selections, call recording, call conferencing, call transferring, and even placing calls to employees in other countries. The IP 720 also boasts standard Power over Ethernet (PoE) and a PSB port for direct compatibility with Plantronics devices.

With the 4 line, backlit liquid crystal display the IP 720 is capable of displaying time, Caller ID name and number, real-time call center workgroup statistics, do-not-disturb, and call forwarding status.

Make the phone yours. You can personalize the IP 720 with 15 backlit user-defined keys. These programmable keys can be setup for any combination of configurable features like, but not limited to, speed-dialing, extension busy/ringing appearances, call appearances, line appearances, and workgroup activity status.

Accessorize the IP 720 with 3rd party hands free headsets using Altigen's dedicated headset answering button and amplified industry standard RJ9 headset port or the Plantronics PSB port. Altigen also provides you with 14 combined traditional and melodic ring tones which can also be assigned to line and extension appearances on the programmable keys.
