

IP 710

IP Telephone

The IP 710 is a fully featured IP telephone designed to empower the user.

Bringing stylish form and functionality to the desktop, the IP 710 makes sophisticated features simple and intuitive to use. Users have single button access to voicemail, activity/presence selection, voicemail greeting selections, call recording, call conferencing, call transferring, and even placing calls to employees in other countries.

***"SIMPLICITY is the word!
— My learning curve from
previously using a traditional
PBX digital phone to the new
IP 710 was accomplished in
minutes!"***

Denise Hodges
OptiNet Systems, Vancouver, BC.

With the 4 line, backlit liquid crystal display the IP 710 is capable of displaying time, Caller ID name and number, real-time call center workgroup statistics, do-not-disturb, and call forwarding status.

Make the phone yours. You can personalize the IP 710 with 15 backlit user-defined keys. These programmable keys can be setup for any combination of configurable features like, but not limited to, speed-dialing, extension busy/ringing appearances, call appearances, line appearances, and workgroup activity status.

Accessorize the IP 710 with 3rd party hands free headsets using AltiGen's dedicated headset answering button and amplified industry standard RJ9 and 2.5mm headset ports.

AltiGen also provides you with 14 combined traditional and melodic ring tones which can also be assigned to line and extension appearances on the programmable keys.

Productivity Features:

- ▶ One button access for voice recording to your personal voicemail box or to a centralized server
- ▶ One button access to voicemail
- ▶ One button access to activity/presence codes
- ▶ 15 user programmable keys for extension, call and line appearances, access to system features, and speed dialing
- ▶ Workgroup real-time statistics on the telephone display for use by workgroup service agents or supervisors
- ▶ Auto answer feature allowing calls to be answered automatically to a defined voice device within a specific ring time. Great for call center service agents with headsets or office operators
